The authors sincerely apologise for errors in Table 3 of their paper titled above published in the journal, volume **162**, number 3, pages 453–475. The errors occur in the data presented for the study by Musolino & Bronstein 2001 (and not Musolino *et al.* 2001 as published). The table with the correct data is published in full below:

European Journal of Endocrinology **162** 1167

Table 3 Summary of growth of prolactinomas during pregnancy

Series	Patient number and characteristics	Symptomatic tumour growth (%)	Asymptomatic tumour growth (%)
Molitch (1985) (136)	Two hundred and forty-six patients with microprolactinoma without previous history of surgery or irradiation	1.6	4.5
Molitch (1985) (136)	Forty-five patients with macroprolactinoma with previous history of bromocriptine before gestation	15.5	8.9
	Forty-six patients with macroprolactinoma with previous history of surgery or irradiation before gestation	4.3	
Musolino & Bronstein (2001) (137)	Forty-one patients with microprolactinoma with previous history of bromocriptine before gestation	2.4	5
	Twenty-two patients with microprolactinoma with previous history of surgery before gestation	0	4.5
Musolino & Bronstein (2001) (137)	Thirty patients with macroprolactinoma with previous history of bromocriptine before gestation	37	17.4
	Twenty-one patients with macroprolactinoma with previous history of surgery before gestation	0	0
