This article has been retracted by the journal. The retraction was made before the article reached its final form in the publication process. However, the authors' accepted manuscript, prior to copy editing, page layout and proofing, was made available online as a European Journal of Endocrinology Accepted Preprint on 17 February 2012.

The article has been retracted because it was submitted without prior knowledge or consent of one or more listed authors.

The journal's ethical guidelines state that authors must 'ensure all contributors have approved the final version of the manuscript and its submission to the journal'.

Submitting author Dr Paul Grant has apologised for his actions. The journal has decided that, in view of the breach of the journal's ethical guidelines, the article should be retracted.

We apologise to our readers.
