

Supplemental Figure 3 Effect of forskolin (10 μ M) or the PKA inhibitor H89 (10 μ M) on the mRNA expression levels of the cAMP target gene *ICER* as determined by quantitative RT-PCR in 28 adenoma samples. Comparison between normal pituitaries, untreated adenoma samples (control) and samples treated with forskolin (10 μ M) or the PKA inhibitor H89 (10 μ M) for 8 hours, ** $p < 0.01$, *** $p < 0.001$ vs. control. All values are mean \pm 95% confidence interval.
