Supplemental Figure 6 – Trends in clinical and biochemical parameters in the French Acromegaly Registry (A-H). Data on fasting plasma glucose (A), HbA1c (B), total (C) and LDL (D) cholesterol, triglyceride (E), body weight (F), and systolic (G) and diastolic (H) blood pressure are reported as boxes and whiskers (interquartile ranges), and refer to the same patients at inclusion and at the last visit. *p<0.05; **p<0.01; ***p<0.0001; ****p<0.00001.
