Supplementary Table 2: Distribution according to centers and diagnosis

The distribution according to centers and diagnosis shows that Berlin, Düsseldorf, Würzburg contributed homogenously over time to the recruitment of patients. Freiburg contributed only 4 patients and Warsaw started to enroll patients from 2012. The vast majority of patients was enrolled in Munich, limiting the generalization of the results. noAVS = no adrenal venous sampling, APA = aldosterone-producing adenoma, BAH = bilateral adrenal hyperplasia.
